What is EMSCULPT Technology?

EMSCULPT is based on high-intensity focused electromagnetic energy. A single EMSCULPT session feels like thousands of powerful muscle contractions which are extremely important in improving the tone and strength of your muscles.

These powerful induced muscle contractions not achievable through voluntary contractions. The muscle tissue is forced to adapt to such extreme condition. It responds with a deep remodeling of its inner structure that results in muscle building and sculpting your body.

A Full Solution for Muscle & Fat

Emsculpt System provides safe and effective muscle building and fat removal treatments for a wide area of body, including:

◆ Abdomen ◆ Buttocks ◆ Arms ◆ Calves ◆ Thighs
